

BROS Ingredients Limited offers a comprehensive portfolio of high-performance solvents—including Acetates, Acrylates, Monomers, and other specialty grades—designed to meet the diverse formulation needs across a wide range of industries.

These include Pharmaceuticals, Paints and Coatings, Printing Inks, Cosmetics and Personal Care, Food and Beverage, Cleaning and Degreasing, Automotive, Dyes and Pigments, Adhesives, Chemical Manufacturing, Aerosols, Agrochemicals, and other related sectors.

Our solvent solutions are technically vetted, globally benchmarked, and supported by a robust supply network, ensuring consistent quality, regulatory compliance, and reliable delivery for industrial applications.

Common use of Solvents

Solvent products are utilized in almost all manufacturing processes in a wide variety of applications.

Many of the products we use that are vital to everyday modern living such as pharmaceuticals, personal care or electronics are all manufactured using solvents in their processes.

With a commitment from the industry to improve the functionality and environmental characteristics of solvent products, new applications are continuously being developed.

The following applications all use solvents in the process of their manufacture;

- ✓ **Pharmaceuticals**
- ✓ **Paints and Coatings**
- ✓ **Printing Inks**
- ✓ **Agrochemicals**
- ✓ **Cosmetics and Personal Care**
- ✓ **Food and Beverage**
- ✓ **Cleaning and Degreasing**
- ✓ **Aerosols**
- ✓ **Automotive**
- ✓ **Dyes and Pigments**
- ✓ **Adhesives**
- ✓ **Chemical Manufacture**

Acetates - Acrylates – Alcohols – Chlorinated Solvents

Acetates	Acrylates	Alcohols	Chlorinated solvents
n-Butyl acetate	2-Ethyl hexyl acrylate	2-Ethyl hexanol	Methylene chloride
Ethyl acetate	2-Hydroxy ethyl acrylate	Benzyl alcohol	Perchloroethylene
Isopropyl acetate	2-Hydroxy ethyl methacrylate	Diacetone alcohol	Trichloroethylene 1st gr
n-Propyl acetate	2-Hydroxy propyl acrylate	Fatty alcohol C12-14	
	2-Hydroxy propyl methacrylate	Isobutyl alcohol	
	Acrylamide	Isopropyl alcohol	
	Acrylic acid	n-Butyl alcohol	
	Butyl acrylate	n-Propyl alcohol	
	Ethyl acrylate		
	Methacrylic acid		
	Methyl acrylate		
	Methyl methacrylate MeHQ		
	Methyl methacrylate Top A		
	n-Butyl methacrylate		

Glycols – Glycol Ethers – Hydrocarbons - Ketones

Glycols	Glycol ethers	Hydrocarbons	Ketones
Diethylene glycol	Butyldiglycol	Cyclohexane	Acetone
Dipropyleneglycol	Butyldiglycolacetate	n-Heptane	Cyclohexanone
Hexylene glycol	Butylglycol	n-Hexane	Diisobutyl Ketone
Monoethyleneglycol	Ethyldiglycol	Solvent Naphtha 100	Methyl Ethyl Ketone
Monopropyleneglycol Natural Gr	Ethylglycol	Solvent Naphtha 150	Methyl Isobutyl Ketone
Monopropyleneglycol Industrial		Solvent Naphtha 200	
Monopropyleneglycol USP		Special Boiling Points 60-95	
Polyethyleneglycol 200		Special Boiling Points 80-110	
Polyethyleneglycol 300		Special Boiling Points 140-165	
Polyethyleneglycol 400		Toluene	
Polyethyleneglycol 1500		White Spirit	
Polyethyleneglycol 4000		Xylene	
Polyethyleneglycol 6000			
Triethyleneglycol			

Monomers – Plasticizers – Propylene Glycol ethers – Vegetable Oils

Monomers	Plasticizers	Propylene glycol ethers	Vegetable oils
Styrene Monomer 40	Chlorinated paraffin 45	Dipropylene glycol mono butyl ether	Coconut Oil RBD
Styrene Monomer 50	Chlorinated paraffin 50	Dipropylene glycol mono methyl ether	Fatty Acids
Styrene Monomer 75	Dibutyl Phthalate	Dipropylene glycol N-propyl ether	Glycerine Tech Grade
Styrene Monomer 100	Diisobutyl Phthalate	Dipropylene glycol normal butyl ether	Glycerine USP-BP
Styrene Monomer	Diisononyl Phthalate	Ethoxy propanol	Refined Soy Bean Oil
Vinylacetate Monomer	Diethyl Adipate	Methoxy propanol	Soy Bean Oil
	Diethyl Phthalate	Methoxy propyl acetate	
	Diethyl Terephthalate	Mono propylene glycol mono butyl ether	
	Epoxidized Soybean Oil	Propylene glycol N-propyl ether	
		Tri propylene glycol	
		Tri propylene glycol mono butyl ether	

Others

Others		
1.4 Butanediol	Gum Rosin X	Fatty Alcohol Ethoxylate
Acetic Acid Glacial Tech Grade	Hexamine stab	Gum Rosin WW
Acetonitrile	Hexamine unstab	Pentaerythritol 95%
Adipic Acid	Isophorone	Pentaerythritol 98%
Aluminium Paste	Maleic Anhydride	Phenol 90%
Butyl Hydroxy Toluene	Methylene Bisphenylisocyanate (MDI)	Phenol 99%
Cocodiethanolamide	Monoethanolamine	Nonylphenol Ethoxylates 10
Conventional Polyol	n-Methyl 2 Pyrrolidone	Phthalic Anhydride
Dicyclopentadiene 91%	Nonylphenol Ethoxylates 4	Polyether Polyol 10%
Dicyclopentadiene UPR 82-89	Nonylphenol Ethoxylates 5	Tetrahydrofuran
Diethanolamine	Nonylphenol Ethoxylates 6	Toluene Diisocyanate 80/20
Dimer Acid	Nonylphenol Ethoxylates 8	
Dimethylformamide	Nonylphenol Ethoxylates 9
